DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks, filed 11/6/06, with respect to the rejection(s) of the claim(s) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Matsuda U.S. Patent Application Publication 2002/0143650.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3, 5, 7-18, 20 and 22-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Matsuda U.S. Patent Application Publication 2002/0143650. Regarding claims 1 and 16, Matsuda discloses a method of communicating semiconductor manufacturing information (abstract), the method comprising: providing, by a first service provider, a lot of semiconductor components to a second service provider for processing (pg. 2, ¶21); receiving, by the first service provider, first information associated with the processing, from the second service provider (pg. 2, ¶23 and Fig. 1, #22); generating, by the first service provider, second information responsive to the first information (pg. 2, ¶24 and Fig. 1, #25) and outputting, by the first service provider, second information determined in response to the first information, to a

customer affiliated with the second service provider (pg. 2, ¶22).

Regarding claims 2, 3, 5, 17, 18 and 20, Matsuda discloses the method of claim 1 further comprising: in association with providing the lot of semiconductor components to the second service provider for processing, providing, by the first service provider, a virtual work order to the second service provider (pg. 2, ¶21). Matsuda discloses the method of claim 1, wherein the first service provider and the second service provider are separate business organizations (Fig. 1, #1 and 2). Matsuda discloses the method of claim 1, wherein the first information includes work-in-process ("WIP") information (pg. 5 and 6, ¶42 and 51).

Regarding claims 7-9 and 22-24, Matsuda discloses the method of claim 5, wherein receiving the WIP information is by periodically receiving the WIP information, in response to passage of a predetermined period of time (pg. 4, ¶37). Matsuda discloses the method of claim 1, wherein the first information includes shipping information (pg. 5, ¶41). Matsuda discloses the method of claim 1, wherein the first information includes lot yield information (pg. 2, ¶21).

Regarding 10-15 and 25-30, Matsuda discloses the method of claim 1, wherein receiving the first information and outputting the second information are by receiving and outputting through a network (pg. 2, ¶27). Matsuda discloses the method of claim 10, wherein the network is a global computer network (pg. 2, ¶27). Matsuda discloses the method of claim 10, wherein receiving the first information and outputting the second information are by receiving and outputting using the file transfer protocol ("FTP") (pg. 2, ¶27). Matsuda discloses the method of claim 10, wherein receiving the first information and outputting the second information are by receiving and outputting using the hyper text transfer protocol ("HTTP") (pg. 2, ¶27). Matsuda discloses the method of claim 1, wherein the lot of semi-conductor components is a lot of

Art Unit: 2125

integrated chips ("IC's") (pg. 2, ¶21). Matsuda discloses the method of claim 1, wherein the second information includes the first information (pg. 2, ¶21).

Allowable Subject Matter

4. Claim 6 is allowed.
5. Claims 4, 19 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

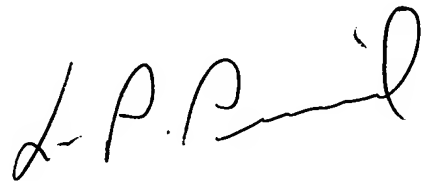

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles R. Kasenge whose telephone number is 571 272-3743. The examiner can normally be reached on Monday through Friday, 8:30 - 5 pm.
